**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund, managed as a feeder fund, aims to achieve long-term capital appreciation and match or exceed the return on the Philippine Stock Exchange Index (PSEi). Investments will primarily be in target fund, Philequity Fund, Inc. (PEFI) (at least 90% of the total portfolio) and fixed income or money market securities with an average duration of one (1) year or less. Managed by Philequity Management Inc., *PEFI is a growth-oriented mutual fund that is invested in shares of stock that are listed in the Philippine Stock Exchange. It is the ideal choice for investors looking for long-term capital appreciation but do not have the expertise and the resources necessary to actively manage a stock portfolio. (www.philequity.net)*

**A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.**

The **STERLING PHILEQUITY FEEDER FUND** is suitable only for investors who:

- Have an aggressive risk profile
- Have an investment horizon of at least five (5) years
- Are willing to be exposed to greater price volatility and risk of an equity investment
- Are looking for long term capital through a managed portfolio of equity securities

## KEY RISK AND RISK MANAGEMENT

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks**

**Business Risk.** Stockholders as fractional owners of corporations share in the fortunes of the business. The rise and fall of stock prices often reflect the market's perception of the prospects of corporations and their management to reward stockholders for taking risks unique to each business. Business risk can be reduced through diversification.

**Country/Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.

**Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.

**Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.

**Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.

**Interest rate Risk.** The value of fixed income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.

**Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.

**Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.

### **Risks specific to Feeder Funds:**

As Feeder Funds invest substantially all of their assets in shares of other collective investment schemes, unitholders are exposed to other unique risks of feeder funds.

The success of the Feeder Funds will be significantly dependent upon the Target Fund's portfolio managers and their expertise and ability to attract and retain suitable staff.

There is also the risk of loss due to intentional or inadvertent deviations from the portfolio managers' communicated investment strategy, including excessive concentration, directional investing outside pre-defined ranges, fraud, excessive risk taking or simply poor judgment. The portfolio managers may use propriety investment strategies or complex models that are not fully disclosed to Sterling Bank.

Redemptions and contributions may be delayed due to disruption or delay in transmission of data and funds between Feeder Funds and Target Funds

**Other Risks.** Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Sterling Bank of Asia. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stock, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

- THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE

The Fund, managed as a feeder fund, aims to achieve long-term capital appreciation and match or exceed the return on the Philippine Stock Exchange Index (PSEi). Investments will primarily be in target fund, Philequity Fund, Inc. (PEFI) (at least 90% of the total portfolio) and fixed income or money market securities with an average duration of one (1) year or less. Managed by Philequity Management Inc., *PEFI is a growth-oriented mutual fund that is invested in shares of stock that are listed in the Philippine Stock Exchange. It is the ideal choice for investors looking for long-term capital appreciation but do not have the expertise and the resources necessary to actively manage a stock portfolio. (www.philequity.net)*

**A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.**

The **STERLING PHILEQUITY FEEDER FUND** is suitable only for investors who:

- Have an aggressive risk profile
- Have an investment horizon of at least five (5) years
- Are willing to be exposed to greater price volatility and risk of an equity investment
- Are looking for long term capital through a managed portfolio of equity securities

## KEY RISK AND RISK MANAGEMENT

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks**

**Business Risk.** Stockholders as fractional owners of corporations share in the fortunes of the business. The rise and fall of stock prices often reflect the market's perception of the prospects of corporations and their management to reward stockholders for taking risks unique to each business. Business risk can be reduced through diversification.

**Country/Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.

**Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.

**Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.

**Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.

**Interest rate Risk.** The value of fixed income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.

**Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.

**Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.

### **Risks specific to Feeder Funds:**

As Feeder Funds invest substantially all of their assets in shares of other collective investment schemes, unitholders are exposed to other unique risks of feeder funds.

The success of the Feeder Funds will be significantly dependent upon the Target Fund's portfolio managers and their expertise and ability to attract and retain suitable staff.

There is also the risk of loss due to intentional or inadvertent deviations from the portfolio managers' communicated investment strategy, including excessive concentration, directional investing outside pre-defined ranges, fraud, excessive risk taking or simply poor judgment. The portfolio managers may use propriety investment strategies or complex models that are not fully disclosed to Sterling Bank.

Redemptions and contributions may be delayed due to disruption or delay in transmission of data and funds between Feeder Funds and Target Funds

**Other Risks.** Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Sterling Bank of Asia. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stock, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

- THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE
