Quarterly Investment Disclosure Statement – 30 September 2012

Net Asset Value Per Unit

Php1.09020

Short Description

The **Sterling Money Market Fund** is a peso denominated money market Unit Investment Trust Fund launched last April 7, 2009. It is suited for professionals, corporations, high-salaried OFWs, and other individuals or corporations who are looking to invest over the short to medium-term. These are clients who intend to settle for return on investment that is higher than the regular traditional deposit products, and are aware that a higher return is accompanied by a higher level of risk. These clients are also willing to expose the funds to a certain level of risk thus can accept some near-term or temporary fluctuations in value of investments.

The investment objective of the Fund is to generate a steady stream of income by investing in a diversified portfolio of short term government securities, money market securities, and other highly marketable fixed-income instruments up to maximum tenor of five years but at an average maturity duration of one year or less.

The Fund aims to achieve a rate of return based on the prevailing PDST-R2 rate plus 0.25% to 1%.

Market Update & Outlook

The Philippines continues to improve financially compared to neighboring countries with strong revenue collection and guarded government spending. The country's government and private foreign debt has slightly increased as investors have a favorable feedback from offshore market.

The local markets remained steady in anticipation to ongoing developments in the European and Middle East situation.

Despite the ongoing global crisis, the Philippine economy has been tagged as one of the most favorable economies in the region.

Investment Strategy

The Sterling Money Market Fund will continue to be invested in various short term high yielding instruments.

We will look for more opportunities to invest in long-term bonds and shall maintain proactive stance in investing.

We will continue to monitor the market for opportunity to lock in gain for our existing investments and for possible additional investment in medium to long-term high yielding bonds to improve investment returns.
