### Market Update & Outlook

Despite the lackluster performance of the regional economy the Philippines remains optimistic. As such, it is expected to receive a favorable credit ratings.

Said upgrade is credited to the assumption on the increase in Government savings and an improvement on investor confidence in the country's finances.

An increase in the country's credit ratings would reduce the cost in external borrowings which would equate to a strong external liquidity and improve fiscal position.

Regional currencies weakened awaiting Germany's decision on the European Financial Stability Fund

### Investment Strategy

The Sterling \$ Money Market Fund will remain invested in short term high yielding instruments as we wait for better opportunities to invest in medium to long-term bonds. We shall maintain proactive stance in investing.
