

Quarterly Investment Disclosure Statement - 31 March 2014

Short Description

Sterling Balanced Fund ("Fund") aims to achieve long term capital and income growth as the Fund will be invested in a combination of select equities or stocks and fixed-income securities over a medium to long term investment period. Investing will try to strike a balance of 60-40 on both securities, subject to the approval by the Trust Committee.

It is suited for professionals, corporations, high-salaried OFWs, and other individuals or corporations who are aware of the opportunity for high yields that stock market investments may provide but also understand the higher risk involving volatility of returns and even possible loss of investment in return for the potential higher long term results.

The Fund aims to achieve a rate of return based on the applicable Three-Year PDST-R2 rate plus 0.25% to 1% (gross of fees) or HSBC Philippines Total Return Bond Index for the fixed income investments; and One-Year return in the Philippine Stock Exchange Index (PSEI) for the equities investments.

Net Asset Value, end of quarter

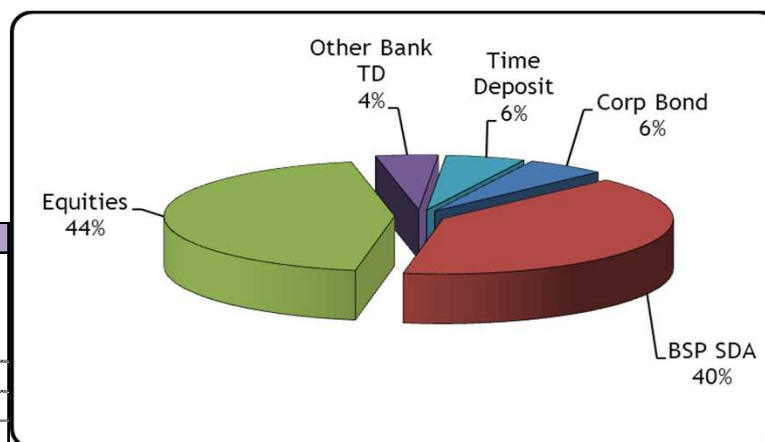

Php 9,183,406.07

Net Asset Value Per Unit

Php 98.71557

Outstanding Investments

Market Update and Outlook

The local equities market closed on a positive note. Having breached the 6,400.00 mark again given in part by the quarter end window dressing of corporations and the comment of the US Federal Reserve's Head Janet Yellen with regard to their "accommodative" monetary policies.

Investor confidence would still remain having acknowledged the Philippines as an emerging market having taken into consideration the crisis in eastern Europe and concerns over China's economic woes.

Range trading will continue to dominate taking advantage of bargain prices and taking profits on gains.

Investment Strategy

Sterling Trust will continue to focus on the top performing issues on the PSEI with consideration to the technical and fundamental performance and diversification of industries and ownership. We will also be on the look out for better opportunities with higher returns

Focus should be on the Fixed Income outlets that will have an average duration of 3-years which maximize opportunities in the Stock Market
